Experimental Evidence on the Productivity Effects of Generative Artificial Intelligence

Shakked Noy Whitney Zhang
MIT MIT

March 2, 2023
Working Paper (not peer reviewed)

Abstract

We examine the productivity effects of a generative artificial intelligence technology—the assistive chatbot ChatGPT—in the context of mid-level professional writing tasks. In a preregistered online experiment, we assign occupation-specific, incentivized writing tasks to 444 college-educated professionals, and randomly expose half of them to ChatGPT. Our results show that ChatGPT substantially raises average productivity: time taken decreases by 0.8 SDs and output quality rises by 0.4 SDs. Inequality between workers decreases, as ChatGPT compresses the productivity distribution by benefiting low-ability workers more. ChatGPT mostly substitutes for worker effort rather than complementing worker skills, and restructures tasks towards idea-generation and editing and away from rough-drafting. Exposure to ChatGPT increases job satisfaction and self-efficacy and heightens both concern and excitement about automation technologies.

Midjourney Prompt: a beautiful landscape of the Massachusetts Institute of Technology in a sunny day with a group of 20 persons in front of their main building like wanting to a photo been taken, photorealistic, 4k, --ar 16:9 -

We gratefully acknowledge financial support from an Emergent Ventures grant, the George and Obie Shultz Fund, and the National Science Foundation Graduate Research Fellowship under Grant No. 1745302. The research described in this article was approved by the MIT Committee on the Use of Humans as Experimental Subjects, and was preregistered at the AEA RCT Registry (AEARCTR-0010882). We thank Daron Acemoglu, Nikhil Agarwal, David Autor, Lucas Barros, Talia Benheim, Amy Finkelstein, John Horton, Simon Jäger, Ailidh Leslie, Jackson Mejia, Ilan Noy, Liora Noy, Emily Partridge, Charlie Raffkin, Aakaash Rao, Nina Roussello, Chris

PROMPT ENGINEER

ANTHROPIC

Prompt Engineer and Librarian

APPLY FOR THIS JOB

SAN FRANCISCO, CA / PRODUCT / FULL-TIME / HYBRID

Anthropic's mission is to create reliable, interpretable, and steerable AI systems. We want AI to be safe for our customers and for society as a whole.

Anthropic's AI technology is amongst the most capable and safe in the world. However, large language models are a new type of intelligence, and the art of instructing them in a way that delivers the best results is still in its infancy — it's a hybrid between programming, instructing, and teaching. You will figure out the best methods of prompting our AI to accomplish a wide range of tasks, then document these methods to build up a library of tools and a set of tutorials that allows others to learn prompt engineering or simply find prompts that would be ideal for them.

Given that the field of prompt-engineering is arguably less than 2 years old, this position is a bit hard to hire for! If you have existing projects that demonstrate prompt engineering on LLMs or image generation models, we'd love to see them. If you haven't done much in the way of prompt engineering yet, you can best demonstrate your prompt engineering skills by spending some time experimenting with Claude or GPT3 and showing that you've managed to get complex behaviors from a series of well crafted prompts.

- The expected salary range for this position is \$250k - \$375k USD.

Hybrid policy & US visa sponsorship: Currently, we expect all staff to be in our office at least 25% of the time. We do sponsor visas! However, we aren't able to successfully sponsor visas for every role and every candidate; operations roles are especially difficult to support. But if we make you an offer, we will make every effort to get you into the United States, and we retain an immigration lawyer to help with this.

LinkedIn tracking: #LI-DNI

We encourage you to apply even if you do not believe you meet every single qualification. Not all strong candidates will meet every single qualification as listed. Research shows that people who identify as being from underrepresented groups are more prone to experiencing imposter syndrome and doubting the strength of their candidacy, so we urge you not to exclude yourself prematurely and to submit an application if you're interested in this work. We think AI systems like the ones we're building have enormous social and ethical implications. We think this makes representation even more important, and we strive to include a range of diverse perspectives on our team.

4 tipos de persona ante la tecnología (y más aún ante la IA)

1. NEGACIONISTA

“la IA me va a quitar el trabajo”

“No quiero saber nada de esto...”

“Prefiero hacerlo como toda la vida”

“Soy mayor para aprender cosas nuevas”

2. ESCÉPTICO

“Lo he probado y no es para tanto”

“A mi no me funciona tan bien”

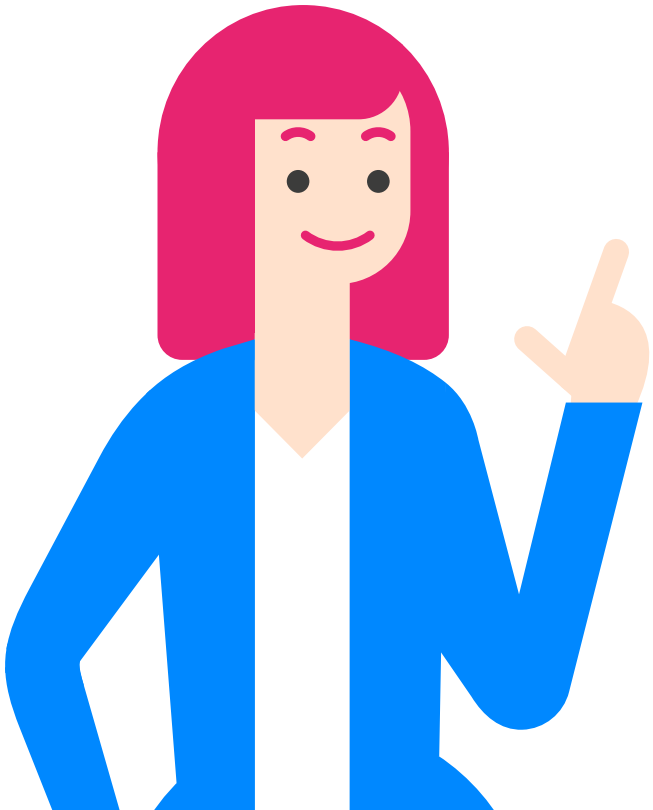

“Los resultados no son lo que esperaba”

“Al final no gano tanto tiempo con la IA”

3. PRÁCTICO

“Lo uso en varias tareas de mi trabajo”

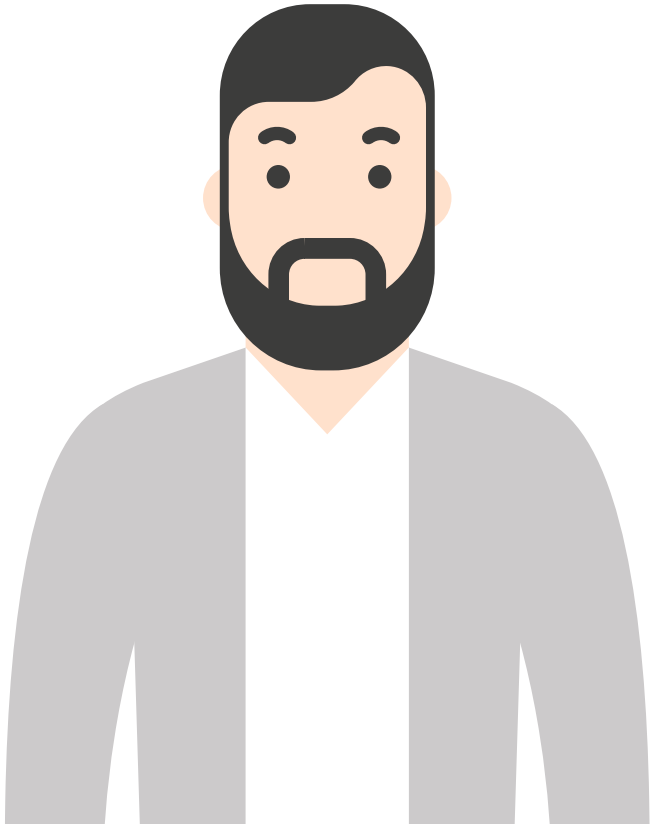

“Me libera de algunas rutinas diarias”

“Voy mejorando poco a poco mis resultados”

“Veo la IA como una herramienta, no como un sustituto”

4. TECNÓLOGO O GURÚ PASADO DE ROSCA

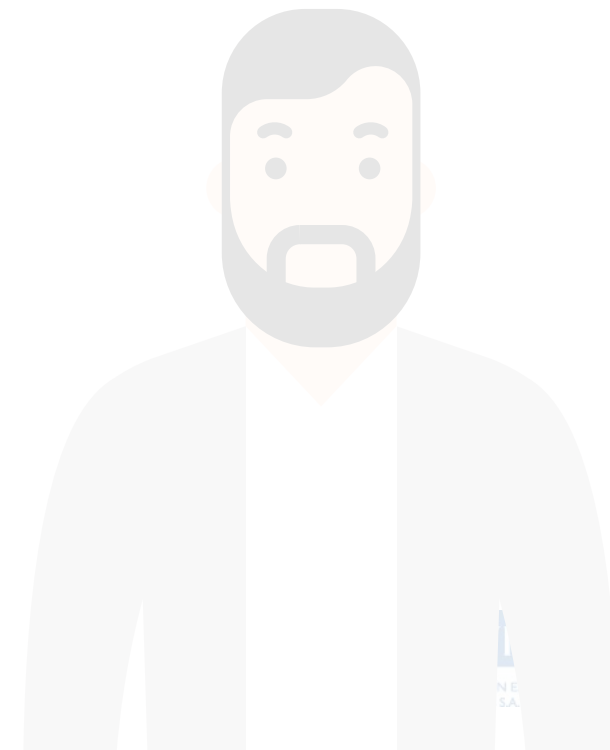

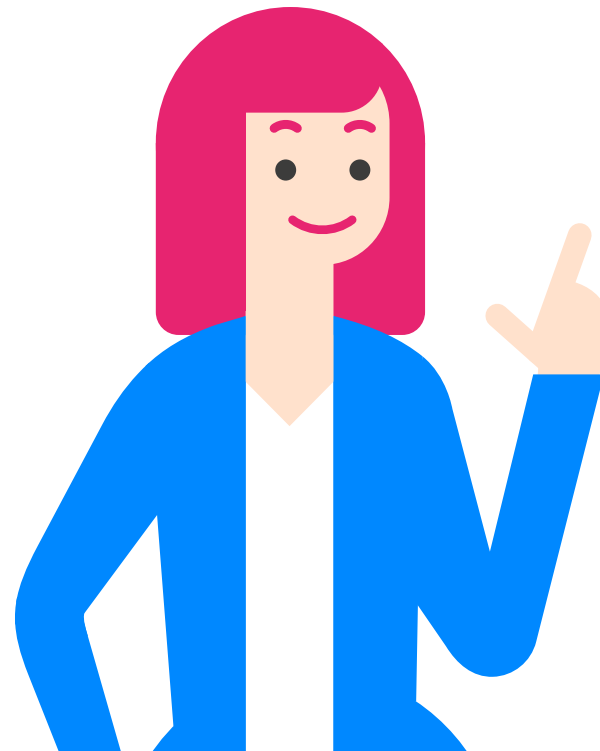

“La IA ha sustituido todos mis procesos”

“Mira cómo gano mucho dinero con la IA en 2 minutos”

“Confío en la IA ciegamente para todo”

“Intento vender las bondades de la IA sin analizar nada, solamente por el concepto”

EL RETO MÁS IMPORTANTE ES CONSEGUIR QUE NUESTRO EQUIPO PIERDA ESE MIEDO A PROBAR

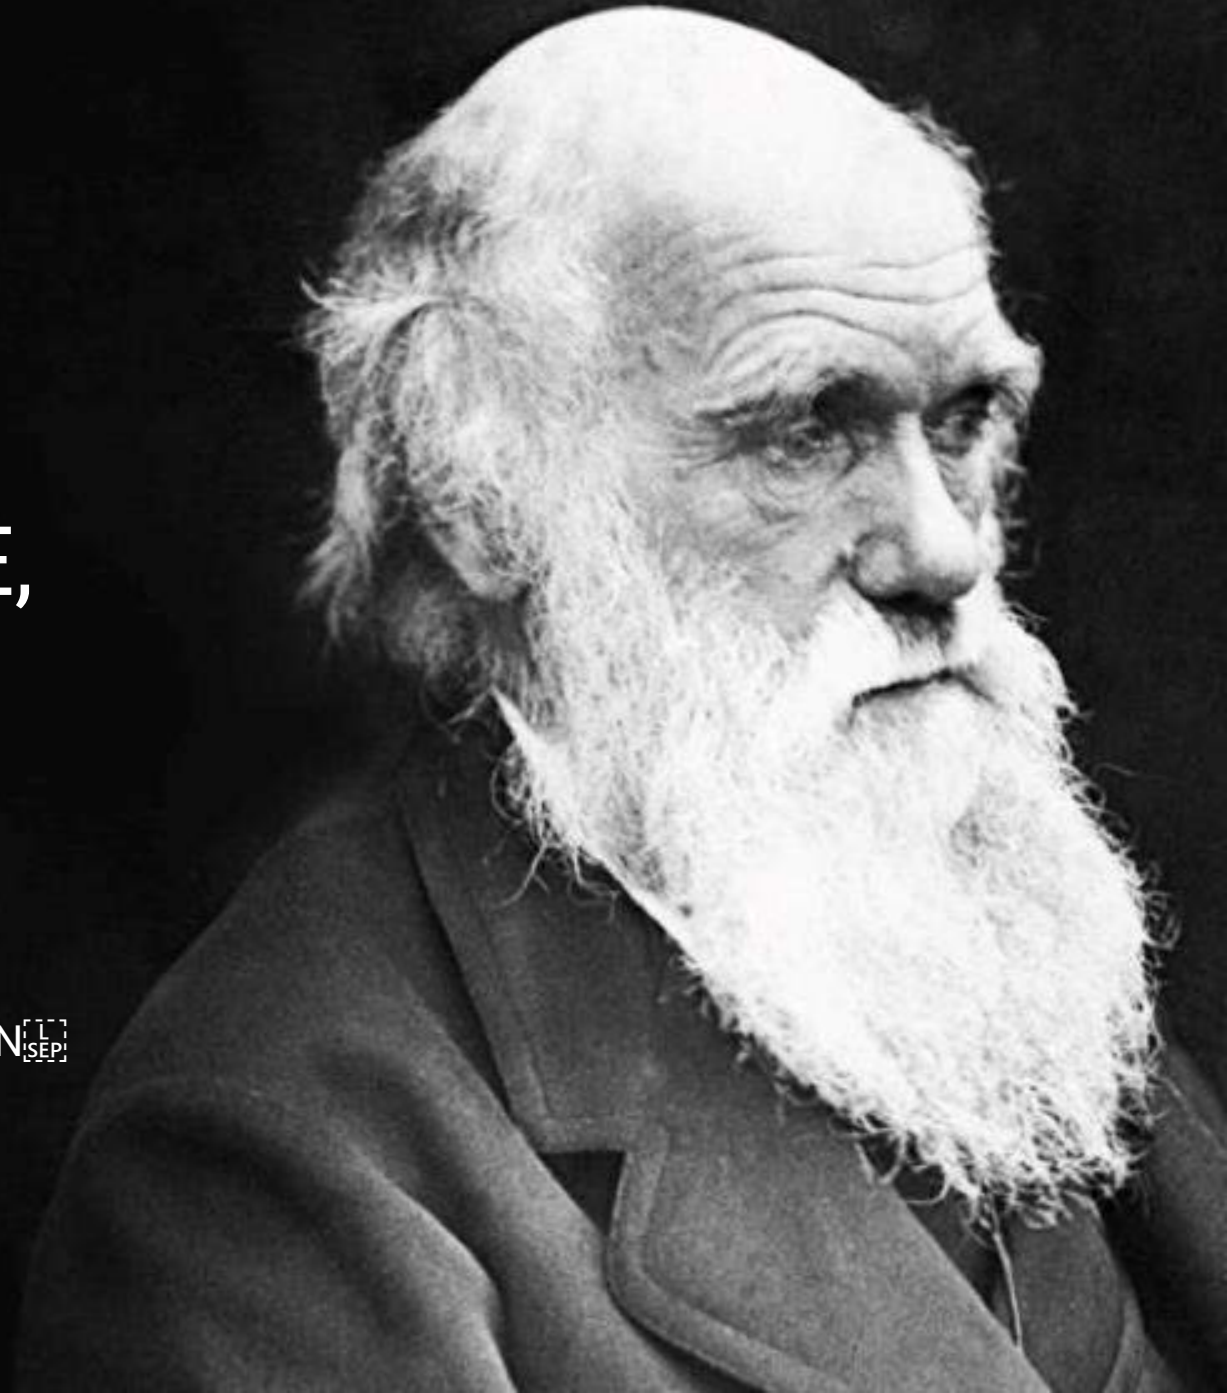

FALLAR ES IGUAL A PROGRESAR

A person in a blue shirt and dark pants stands in the center of a large, complex maze. The maze is made of light blue walls and has a central path leading to a bright light source at the top. The person is looking towards the light, symbolizing progress and overcoming challenges.

✓ Analyzing the image: Privacy blur hides faces from Bing chat

This is a photo of a small dog sitting on a beige blanket. The dog is wearing a red collar with a black leash attached. The background is blurred and appears to be a living room with a window and a chair. Here are some more details about the photo:

- The dog is a **Maltese** breed, which is known for its long, silky white coat and friendly personality.
- The blanket is a **knitted** one, with a pattern of alternating squares of light and dark beige colors. It looks soft and cozy.
- The window behind the dog has white curtains and a view of the night sky. There are some stars visible in the dark blue sky.
- The chair next to the window is a **recliner** chair, with a brown leather cover and a footrest. It looks comfortable and inviting.
- The leash on the dog's collar is a **retractable** one, which allows the owner to adjust the length of the leash according to the situation. It has a black handle and a metal clip.

I hope this description helps you to appreciate the photo better. 😊

Hagamos un ejemplo del uso de estas cuatro tecnologías

IIElevenLabs

Ejemplo de caso de uso sobre una fotografía

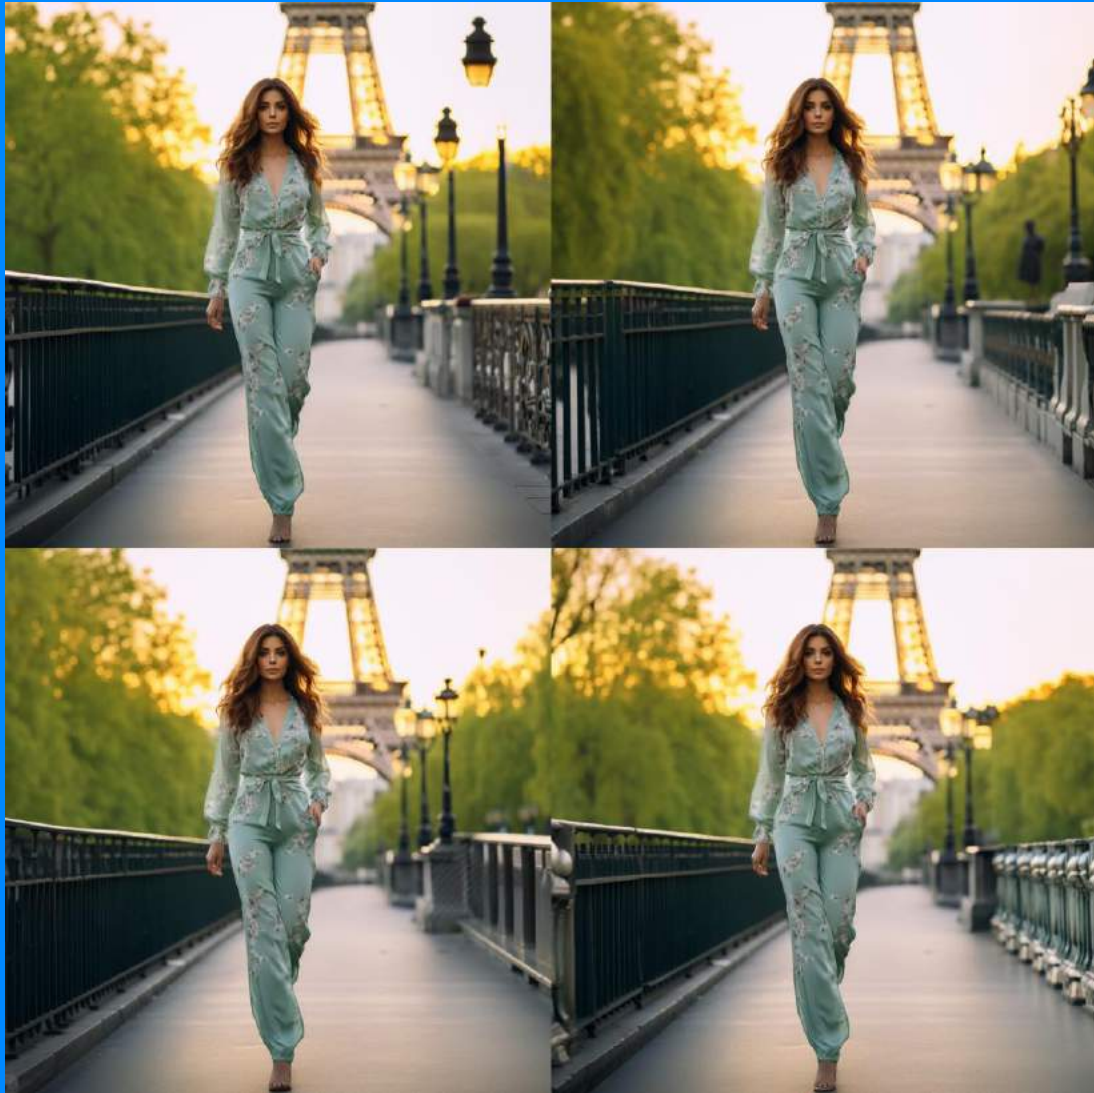

1. Busco una foto de una persona, en este caso mi sobrina.
2. Pido permiso por escrito para poder hacer uso de ella
3. Utilizo Midjourney para que me identifique que prompt se debería de realizar para poder crear imágenes similares.
 1. Comando /describe y subo la foto
4. Utilizo los 4 prompts que me da, para generar uno nuevo y añado los complementos que quiero añadir.
 1. Paris
 2. Tour Eiffel
5. Utilizo Midjourney para generar 4 fotografías similares a esta con los conceptos que he añadido.

Ejemplo de caso de uso sobre una fotografía

6. Elijo cual de las fotografías es la que mas me gusta, usando los botones de opciones que Midjourney me da.
 - U1-U2-U3-U4 es seleccionar la fotografía que quiero y hacerla en tamaño mayor.
 - V1-V2-V3-V4 es hacer variaciones de esa fotografía similares.
7. Cuando he elegido la fotografía, la guardo en mi ordenador y podría hacer Zoom sobre ella, cambiar las dimensiones y reinventar lo que hay a sus lados.
8. Cuando ya la tengo voy a ChatGPT y genero un texto que me gustaría que hablara, siguiendo el patron CIDI.
9. Copio el texto de salida cuando lo tenga perfecto, adapto y me voy a Elevenlabs para generar una voz que me encaje en la persona. Puedo clonar una voz de alguien.
10. Voy con todo ello a DI-D y genero un video de esa persona hablando lo que he generado en ChatGPT y he convertido en voz con Elevenlabs.

D-ID

Ejemplo de caso de uso sobre una fotografía

Una vez que tenemos la imagen la podemos animar con otra tecnología mas, Runway ML

Si es tu primera vez interactuando con nuestra IA hemos creado varios ejemplos de consulta que podemos realizar y obtener resultados muy útiles.

Claro, para utilizar el embedding almacenado en Supabase y utilizarlo con LangChain para hacer una predicción de texto con un modelo GPT, necesitarías seguir los siguientes pasos:

1. Conectarse a Supabase: Necesitas conectar tu aplicación LangChain a Supabase para poder acceder a los datos almacenados en la base de datos. Esto lo puedes hacer utilizando la biblioteca cliente de Supabase para el lenguaje de programación que estés utilizando. Por ejemplo, para JavaScript, puedes usar la biblioteca `@supabase/supabase`.
2. Leer los embeddings almacenados: Una vez que te hayas conectado a Supabase, puedes leer los embeddings almacenados en la base de datos. Para hacerlo, debes ejecutar una consulta SQL para seleccionar los datos de la tabla donde se almacenan los embeddings.

Si es tu primera vez interactuando con nuestra IA hemos creado varios ejemplos de consulta

Alright, okay, perfect. And then you mentioned the main points to move away from other solutions, complexity, but you also mentioned the pricing. I you expect or like, what would make you upgrade actually, like the value that I get is so good that I paying for a product.

Sophie Jacob

A Notion integration would be very be a good read. So for example, when I have feedback calls it would be able to label meeting moments and have them into our existing Notion feedback boards. It would of time in synthesizing these insights.

The screenshot shows the QuillBot Paraphraser interface. At the top left is the QuillBot logo. The main title is "Paraphraser". On the right, there is a green "Upgrade to Premium" button, a US flag, a moon icon, and a user profile icon. Below the title, there are language options: "English (US)", "French", "Spanish", "German", and "All". The "Modes" section includes "Standard" (selected), "Fluency", "Formal", "Simple", "Creative", "Expand", and "Shorten". A "Synonyms" slider is set to a low level. The main text area contains the instruction: "To rewrite text, enter or paste it here and press 'Paraphrase.'" Below this are two buttons: "Try Sample Text" and "Paste Text". At the bottom left is an "Upload Doc" button, and at the bottom center is a large green "Paraphrase" button. A vertical sidebar on the left contains various utility icons, and a vertical sidebar on the right contains settings, chat, keyboard, and refresh icons.

QuillBot's AI-powered paraphrasing tool will enhance your writing
